

How to Lie with Statistics

Ali Akbar Septiandri

Universitas Al Azhar Indonesia

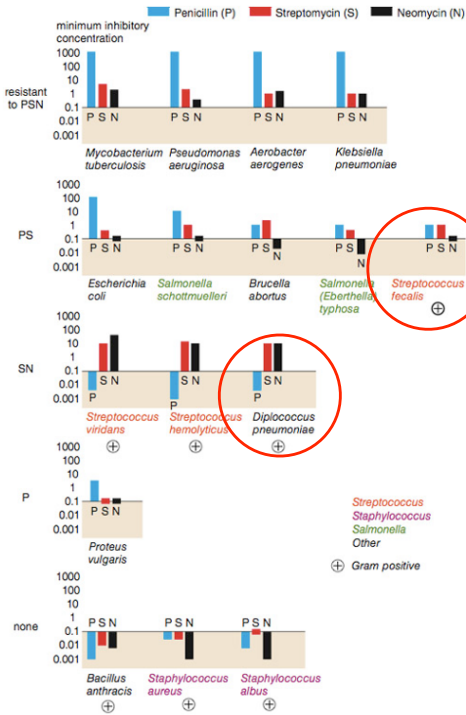

March 19, 2019

“There are three kinds of lies:
lies, damned lies, and **statistics.**”

Visualisasi

Sebagai analis data yang baik,
penting sekali untuk memvisualisasikan data.

Mengapa?

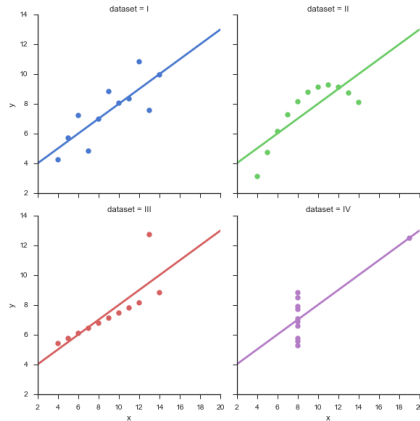

How do the bacteria compare?

Not a streptococcus!
(realized ~30 years later)

Really a streptococcus!
(realized ~20 years later)

Visualisasi vs Summary Statistics

Gambar: *The infamous Anscombe's quartet*

Keempat data tersebut punya
 $\mu_x, \mu_y, \sigma_x, \sigma_y, N, \rho$ yang sama!

*Don't trust summary statistics.
Always **visualize** your data!*

N = 157 ; X mean = 50.7333 ; X SD = 19.5661 ; Y mean = 46.495 ; Y SD = 27.2828 ;
Pearson correlation = -0.1772

Dengan visualisasi, bukan berarti bebas masalah.

Kita tetap bisa berbohong!

Following

A good example of “How to Lie with Statistics”. Maaf mas dokter [@Gamal_Albinsaid](#) , we’re good friends, namun kali ini anda keliru dan mengelirukan masyarakat.

dr. Gamal Albinsaid [@Gamal_Albinsaid](#)

3. Ini bukan soal angka, ini soal luka, Luka Indonesiaku.

Saya katakan ini karena saya menyadari betapa beratnya tugas yang menunggu kita semua di depan sana....

SANFORD AND SELNICK

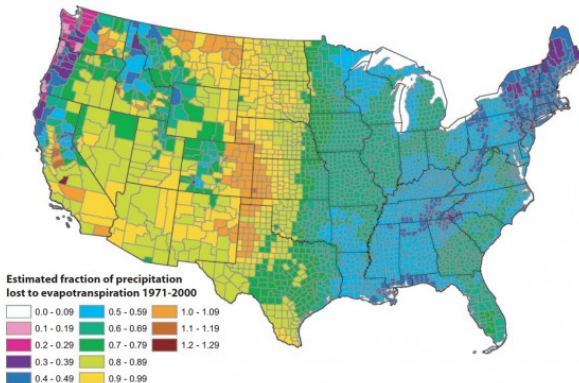

FIGURE 13. Estimated Mean Annual Ratio of Actual Evapotranspiration (ET) to Precipitation (P) for the Conterminous U.S. for the Period 1971-2000. Estimates are based on the regression equation in Table 1 that includes land cover. Calculations of ET/P were made first at the 800-m resolution of the PRISM climate data. The mean values for the counties (shown) were then calculated by averaging the 800-m values within each county. Areas with fractions >1 are agricultural counties that either import surface water or mine deep groundwater.

Korelasi

Korelasi

- Korelasi mengukur hubungan linear antarvariabel
- Nilai korelasi ada di rentang $[-1, 1]$
- Korelasi = 1 berarti berbanding lurus sempurna
- *Correlation doesn't imply causation!*
